

## Step 1

### Establish Your Data Feed

- ✓ Create the process to provide a nightly data feed of your inventory from your property management system.

#### How Long Will it Take?

Create Data Feed: 1-3 Hours

If your data is hosted by your property management system typically all that is required is for you to grant permission to your provider to send VaultWare the necessary data.

## Step 2

### Software Installation & VaultWare Set Up

- ✓ Install the software on any computer in your leasing office or central office where VaultWare is managed.

#### How Long Will it Take?

Software Installation: 1-2 min

- ✓ Begin the guided VaultWare one-time set up process.

VaultWare Set Up: 15-30 min per property

- ✓ Install the software on the remaining computers in your leasing office.

Software Installation: > 1-2 min per PC

- ✓ When you are done, you can then set up the Auto-Rate Updater and simply add your specials.

Auto-Rates Set Up: > 5 min per ILS

Setting up the auto rate updating feature takes less than 5 minutes per property, per ILS once the necessary data is received from the ILS.

## Step 3

### Add VaultWare to Your Corporate Web Site

- ✓ Turn your web site into an even more powerful marketing tool by adding automatic rate updates and the VaultWare-powered "check availability" button.

#### How Long Will it Take?

Web Site Integration: 1-2 weeks
